Foreword

These notes are taken from several publications available in the Internet sites and forums like the MoHPC. I would like to thank all the so many contributors like Katie and Eric to name but a few, that have been sharing their knowledge with us in the good interest of science and technology.

So I have compiled a small table with the HP-12C variants, using the public available information here and there and crossing it for validation.

I'm sure it contains errors as a result of this very incomplete investigation process, but it can be corrected and enhanced when more trusted information becomes available from all of us, HP calculator fans.

Introduction

Most probably the HP-12C calculator has the longest production run in the industry history. Its production began in 1981 having now a life cycle of 34 years and it is still going on.

For those who, like me until recently, didn't care too much about these financial calculators because we as engineers or scientists tend to favor the scientific machines, there are plenty of good reading freely available explaining all the story behind these Voyager calculators.

Some URL references can be found here as well, pointing to documents used to extract the information to build this document.

HP-12C Calculator variants

#	Model	P/N	Years	S/N	Features	CPU	Clock	Execution	F/W version (1)	I/O	Supply	Speed
1	12C	F1637A?	From 1981 To 1988?		RPN, 20R, 100S	1LF5 (HP NUT)	884KHz	Native	ROM	N/A	4.5V (3xLR44)	x1
2	12C	F1637A?	From 1981 To 1988?		RPN, 20R, 100S	1LM2 (HP NUT)	884KHz	Native	ROM	N/A	4.5V (3xLR44)	x1
3	12C	F1637A?	From 1988 To 2001?		RPN, 20R, 100S	1LQ9 (HP NUT)	884KHz	Native	ROM	N/A	4.5V (3xLR44)	x1
4	12C	F1637A?	From 1995 To 2001?		RPN, 20R, 100S	1RR2 (HP NUT)	884KHz	Native	ROM	N/A	4.5V (3xLR44)	x1
5	12C	?	From 1999? To 2007		RPN, 20R, 100S	Agilent 2AF1-0001 (HP NUT)	884KHz	Native	ROM	N/A	3V (1xCR2032)	x1
6	12C	?	From 2001? To 2007		RPN, 20R, 100S	Marvell 2AF1-0002 (HP NUT)	884KHz	Native	ROM	N/A	3V (1xCR2032)	x1
7	12C Platinum (Version 1)	F2231A	From 2003 To 2005?		RPN, ALG, 30R, 400S More digits	Sunplus SPLB20D2 (6502)	~1MHz	Native (Updated specification reimplementation)	ROM	N/A	3V (1xCR2032)	x1.5?
8	12C Platinum (Version 2)	F2232A	From 2005? To 2010?		RPN, ALG, (), BS, 80R, 400S More digits	Generalplus GPLB31A (6502)	~4MHz	Native (Updated specification reimplementation)	ROM	N/A	3V (1xCR2032)	x6?
9	12C Prestige	F2233A	From 2006 To 2014?		RPN, ALG, (), BS, 80R, 400S More digits	Generalplus GPLB31A (6502)	~4MHz	Native (Updated specification reimplementation)	ROM	N/A	3V (1xCR2032)	x6?
10	12C Platinum 25 th An. Ed.	F2231AA	From 2006 To 2008?		RPN, ALG, (), BS, 80R, 400S More digits	Generalplus GPLB31A (6502)	~4MHz	Native (Updated specification reimplementation)	ROM	N/A	3V (1xCR2032)	x6?
11	12C (+) (Revision 1)	F2230A	From 2008 To 2015		RPN, 20R, 100S	Atmel AT91SAM7L128 (ARM7TDMI)	~36MHz	Original ROM on an emulated HP NUT	FLASH 2012-04-03	Pogo 6-pin (Serial I/O)	3V (2xCR2032)	x60
12	12C Platinum (Version 3)	F2232A	From 2010 To 2015?		RPN, ALG, (), BS, 80R, 400S More digits	Generalplus GPLB31A (6502)	~4MHz	Native (Updated specification reimplementation)	ROM	N/A	3V (2xCR2032)	x6?
13	12C 30 th An. Ed.	NW258AA	2011		RPN, 20R, 100S	Atmel AT91SAM7L128 (ARM7TDMI)	~36MHz	Original ROM on an emulated HP NUT	FLASH 2009-07-02	Pogo 6-pin (Serial I/O)	3V (2xCR2032)	x60
14	12C (+) (Revision 2)	F2230A?	From May/2015 To <current>	Starts w/ PHA, 9CJ, 7CD, 3CD	RPN, 20R, 100S	Atmel ATSAM4LC2C (Cortex-M4)	~48MHz	Original ROM on an emulated HP NUT	FLASH 2015-01-30	Pogo 6-pin (USB I/O)	3V (2xCR2032)	x60?

(1) F/W Version – Most recent version found and reported elsewhere.

3rd party HP-12C clones

#	Model	P/N	Years	Features	CPU	Clock	Execution	F/W	I/O	Supply	Speed
1	Aurora FN1000		2003	Clamshell based on 12C			Native. Custom specification reimplementation				
2	Truly SC123		2015	Vertical based on 12C Platinum			Native. Custom specification reimplementation				
3	Victor V12		?	Based on 12C Platinum 25 th A.E.			Native. Custom specification reimplementation				
4	BrnC FC-12		?	Based on 12C Platinum 25 th A.E.			Native. Custom specification reimplementation				
5	Compucessor y CCS28956		2010	Clamshell based on 12C Platinum			Native. Custom specification reimplementation				
6	SwissMicros DM-12CC		2012	Based on 12C, USB I/O xfer	NXP LPC1114 (ARM Cortex-M0)	~48MHz	Original ROM on an emulated HP NUT	FLASH	USB	3V (1xCR2032)	x30
7	SwissMicros DM-12		2013	Based on 12C, USB data I/O	NXP LPC1115 (ARM Cortex-M0)	~48MHz	Original ROM on an emulated HP NUT	FLASH	USB	3V (1xCR2032)	x30
8	SwissMicros DM-12 Silver Ed		2014?	Based on 12C, USB data I/O	NXP LPC1115 (ARM Cortex-M0)	~48MHz	Original ROM on an emulated HP NUT	FLASH	USB	3V (1xCR2032)	x30
